# ANKITA AGRAWAL

### **CAREER OBJECTIVE**

Experienced Java Developer with 6 years of expertise passionate about driving growth for companies. Proficient in Java development, microservice architecture, and API integration. Dedicated to contributing innovative solutions and collaborating with teams to propel organizational success and growth.

## **WORK EXPERIENCE**

# Fair Issac Corporation (FICO)

Software Engineer II (Oct 2023-Present)

### **Project Experience:**

1. North Star: Business Terms Capability

#### Contribution:

- Developing REST and gRPC APIs to facilitate seamless communication between software components.
- Implementing REST APIs using Java and Spring Boot framework
- Utilizing gRPC framework to design and deploy efficient APIs for interservice communication.
- Developed a POC using ANTLR (Another Tool for Language Recognition) to apply google based filtering.

# Infosys Ltd. (Aug 2019-Oct 2023)

Specialist Programmer (Oct 2021-Oct 2023)

# **Project Experience (Client-Apple):**

1. Apollo GSX: Worked on Microservice Architecture.

### Contribution:

- Spearheaded the implementation of Microservice Architecture and Kafka technologies, effectively incorporating new features and requirements.
- Played a pivotal role in ensuring the delivery of defect-free projects, earning recognition as a key team member.
- Collaborated closely with software development and testing teams, contributing to the design and development of robust solutions aligned with client requirements for functionality, scalability, and performance.
- Facilitated productive discussions within the team to determine application requirement specifications.
- Actively engaged in production release activities for numerous releases, effectively communicating with team members to ensure successful deployments.

# 🖶 System Engineer (Jan 2020 – Sep 2021) **Project Experience (Client-BT):**

1. NGD: Worked on Spring Boot and Angular Framework

## Contribution:

- Utilized Spring Boot and Angular Framework for front-end and back-end integration within a Microservices architecture.
- Conducted root cause analyses to swiftly resolve production issues, ensuring seamless operations.
- Collaborated closely with clients to gather requirements and devise effective solutions.

## **AWARDS AND RECOGNITION**

- ADM UNIT RISE AWARD
- INSTA RISE AWARD 2022
- STG EXCELLENCE AWARD NINJA 2022
- INSTA RISE AWARD · Sep 2022
- INSTA RISE AWARD · Jun 2022
- STG EXCELLENCE AWARD NINJA 2022

#### **HOBBIES & INTEREST**

- Badminton
- Video Games
- Painting

### **LANGUAGE**

- English
- Hindi

**2. NBN:** Worked on Network Service provider Sector. **Contribution**:

- Engaged in the Network Service Provider sector, focusing on enhancing infrastructure efficiency.
- Utilized SpatialNet, leveraging AutoCAD and Oracle Database, for spatial analysis and management.

# System Engineer Trainee (Aug 2019 – Dec 2019)

**1. Emergency messaging System** is a client-server model. It is developed with the help of socket programming, spring and angular framework and RESTful API.

### Contribution:

- Developed a project with the help of spring and angular framework.
- Developed different APIs for different modules.

## **EDUCATION**

B.E in Computer Science and Engineering

Jabalpur Engineering College (8.73 CGPA)

Higher Secondary - XII

St. Norbert Girls H S School (93.80%)

High School - X
Pratibha Vidhya Peeth High School (93.67%)

2013
